

Lautaro Ortiz

Data & Automation Specialist | Project Builder

San Luis, Argentina | johnsopranojr@outlook.com | [linkedin.com/in/lautaro-ortiz](https://www.linkedin.com/in/lautaro-ortiz) | github.com/tonysoprano33

SUMMARY

Self-taught Project Builder specializing in identifying operational problems and building end-to-end solutions. Experience using AI agents to accelerate development and data analysis. Track record of shipped production products: sold Excel system, PWA appointment scheduler with 90+ patients, spirometry app reducing paperwork from hours to minutes. Execution speed: 3 weeks from idea to deployment.

EXPERIENCE

Project Builder / Automation Specialist

Freelance | 2025–Present

- End-to-end development: problem identification → MVP → production → training
- Using AI agents (LLMs, Cursor, Claude) to accelerate development and data analysis
- 3 deployed systems: appointment PWA, sold Excel solution, spirometry app

FEATURED PROJECTS

Dental Office Management — Web App

IN PRODUCTION: 90+ patients scheduled. PWA with notifications, appointments, records, multi-device sync

Spirometry Report Generator — Python Desktop

IN PRODUCTION: Reducing paperwork from hours to minutes. Generates Word reports with Excel batch processing

Clinic Management System — Excel (SOLD)

Sold to clinic. Tracking 3,000+ appointments/year, dual-shift, automated financial reports

NexusData AI — Prototype

AI-powered data analysis. LLMs + Groq LPU for <100ms inference

SKILLS

Stack: React, Next.js, Python, PostgreSQL, Supabase, Excel/VBA **AI Agents:** LLM integration, Cursor, Claude, Groq LPU
DevOps: Docker, Git, Vercel
