

Lautaro Ortiz

Data & Automation Specialist | Project Builder

San Luis, Argentina | johnsopranojr@outlook.com | [linkedin.com/in/lautaro-ortiz](https://www.linkedin.com/in/lautaro-ortiz) | github.com/tonysoprano33

PROFESSIONAL SUMMARY

Self-taught Data & Automation Specialist building internal tools and systems for healthcare and business operations. Proven track record of shipping production-ready solutions: sold and deployed an Excel-based clinic management system used daily by medical staff. Dental appointment system with 80+ registered patients and growing. Fast execution from idea to deployment (3 weeks for medical report generator). Continuous learning through online courses and hands-on project development.

EXPERIENCE

Automation & Data Systems Developer

Freelance | 2025–Present

- Built and sold production Excel system for medical clinic appointment scheduling and financial tracking
- Developed Python desktop app generating medical spirometry reports, reducing documentation time from 15+ min to 30 seconds
- Created AI-powered data analysis prototype using LLMs for automated business insights from CSV/Excel files

Data Analyst / Process Optimization

Medical Clinic Operations | 2025–Present

- Identified workflow inefficiencies in 3,000+ annual appointment tracking process
- Designed and deployed automated solutions saving 60% time in daily operations
- Managed end-to-end implementation: identification → solution → training → deployment

FEATURED PROJECTS

Dental Office Management System — Web App (+ 80 REGISTERED PATIENTS)

PWA with real-time notifications, appointment scheduling, patient records, and multi-device sync. Used daily by dentist and secretary.

Medical Clinic Management System — Excel Solution (SOLD)

Production system tracking 3,000+ appointments/year with dual-shift scheduling and automated financial reporting

Spirometry Report Generator — Python Desktop App (HOURS OF TIME OPTIMIZED)

CustomTkinter + python-docx for generating Word reports with Excel batch processing. Deployed in hospital.

NexusData AI — Full-Stack Prototype

React + Python platform exploring AI-powered data analysis, allowing to clean complete datasets without repetitive formulas

TECHNICAL SKILLS

Languages: Python, TypeScript, SQL, VBA **Frontend:** React, Next.js, Tailwind CSS, CustomTkinter

Backend: Python (FastAPI), PostgreSQL, Supabase **Data:** pandas, Excel Advanced, Power Query, python-docx

Tools: Docker, Git, Vercel, AI Integration (LLMs)

EDUCATION

Continuous Self-Learning — Online Courses & Hands-on Projects

Self-taught developer through practical application and specialized online courses

LANGUAGES

Spanish (Native) · English (Intermediate)
